ARTICLE INFO

Article history:

Available online 23 June 2023

This article has been retracted at the request of the Editor-in-Chief.

The paper by the co-author of this author in some previous research, which was previously published in the Journal of Mathematics and Statistics Research, 3(3) (2021), 150, <https://doi.org/10.36266/JMSR/150>, is substantially repeated in this article.

One requirement for submitting a manuscript for publication is that the author or authors specifically state that the paper has not been published before and is not being considered for publication somewhere else. Any item that is used again should have the proper citations. This article thus demonstrates an abuse of the system for publishing scientific research. The scientific community has a very strong opinion on this, and the journal apologizes to its readers for not catching this during the submission process.
